Frontend Developer

Full Stack Web Developer with 2+ years of experience in Web2 and Web3 technologies. Skilled in React, Next.js, Solidity, Rust, and CosmWasm. Active in the ITU Blockchain Club, with hackathon experience and a strong focus on decentralized applications and blockchain solutions. Eager to contribute to innovative projects in software development and Web3 technologies.

Work Experience

Mid Frontend & Mobile Developer

Flalingo | 11/2024 - Present | ABD - California

Flalingo is a mobile application that supports users in their English learning journey through interactive and personalized experiences.

- **AI-Powered Mobile Application Development:** Enhancing and maintaining the functionality of an AI-based mobile application using React Native and Expo.
- **Website Updates:** Implementing updates and improvements on Flalingo's official website to enhance user experience and functionality.
- **Frontend Optimization:** Ensuring responsive, efficient, and clean UI/UX designs across both mobile and web platforms.
- **Bug Fixing and Debugging:** Identifying and resolving issues in the application and website to maintain seamless performance.
- **Collaboration with Teams:** Working closely with designers, backend developers, and product managers for smooth project execution.
- **Staying Updated:** Keeping up-to-date with the latest trends and technologies in mobile development and AI integrations.

Frontend Developer

ITU Blockchain | 06/2023 - Present

ITU Blockchain Club is a student community at Istanbul Technical University, focused on raising blockchain awareness and knowledge.

- Developed award-winning projects as a Frontend Developer in hackathons, using Next.js, Tailwind, and Web3.js to enhance user experience in blockchain applications.
- Contributed to the research team by preparing technical reports and articles on blockchain technology, advancing the club's knowledge base.
- Built user interfaces with Next.js, Tailwind, and integrated MongoDB and Node.js for blockchain-based applications in hackathons.

Frontend Developer

Viviency Digital Media Agency | 01/2024 - 10/2024

Viviency specializes in creating and managing advertising and marketing campaigns across various platforms.

- Developed a 100% SEO-friendly website using WordPress as a Headless CMS, Next.js, React, Tailwind, and Node.js.
- Provided technical solutions for the Viviency team and supported throughout the project.
- Created creative presentations and contributed as a developer to the team's success.
